

Ad-Hoc Query on Processing Data on illegal Migration

Requested by DE EMN NCP on 5th November 2014

Compilation produced on 6th February 2015

Responses from Austria, Croatia, Czech Republic, Estonia, Finland, France, Germany, Greece, Hungary, Italy, Latvia, Lithuania, Luxembourg, Netherlands, Slovak Republic, Sweden plus Norway (17 in Total)

Disclaimer: The following responses have been provided primarily for the purpose of information exchange among EMN NCPs in the framework of the EMN. The contributing EMN NCPs have provided, to the best of their knowledge, information that is up-to-date, objective and reliable. Note, however, that the information provided does not necessarily represent the official policy of an EMN NCPs' Member State.

1. Background Information

The Joint Centre for Illegal Migration Analysis and Policy (GASIM) has questions on processing data on illegal migration. GASIM is made up of representatives from seven German authorities and is, among other things, responsible for developing recommendations on how to fight illegal migration. GASIM is currently preparing a situation report on the effectiveness of selected national and international measures to combat irregular migration. The aim is to thoroughly examine and compare the effectiveness of selected measures and issues in order to identify alternative options for action (best practices).

This situation report also includes the collection, evaluation and analysis of data on illegal migration. The attached questionnaire will provide us with an overview of data on illegal migration, collected at national and international level.

Disclaimer: The following responses have been provided primarily for the purpose of information exchange among EMN NCPs in the framework of the EMN. The contributing EMN NCPs have provided, to the best of their knowledge, information that is up-to-date, objective and reliable. Note, however, that the information provided does not necessarily represent the official policy of an EMN NCPs' Member State.

In Germany, for instance, the Federal Office for Migration and Refugees (BAMF) questions asylum seekers about the specific circumstances of their immigration – regardless of the individual asylum procedure. This interview includes questions on the migration route, the means of transport used, the motivation behind the asylum seeker's decision to come to Germany, the documents, human smugglers, etc. Applied on a voluntary basis, this method of obtaining more information is not a binding part of the asylum procedure. Furthermore, the collected data are anonymized before they are entered into a BAMF database and made available to the respective national stakeholders for evaluation purposes.

Based on the interviews conducted by BAMF, this questionnaire is intended to help us gain additional knowledge that can be used to step up the exchange of information on irregular migration.

From a strategic point of view, a comparable data collection and evaluation process, coordinated at European level, and the resulting intensification of information-sharing could, for instance, help us identify unreported cases of irregular migration, coordinate border police measures and provide stakeholders with recommendations for action.

The aim of this questionnaire is to give us an overview of data on irregular migration, collected at national and international level, and to find out how existing datasets could be connected and used to a greater extent.

We would very much appreciate your responses if possible by **21th November 2014**.

			<p>Additional information provided by the National Police Board of Finland</p> <p>The National Bureau of Investigation collects information on illegal immigration and maintains a national level situation analysis. This analysis is utilized for example in combatting illegal immigration and trafficking in human beings and in directing operational activities. In addition to that the governmental inter-agency level working group on combatting illegal immigration produces an annual situation appraisal regarding illegal immigration. This report describes the situation and phenomena regarding illegal immigration from the point of view of different authorities. It also describes the short term plans for developing the modi operandi of the government authorities in this field and anticipates possible future trends. The report is sent to the ministerial working group on internal security to support them in their political decision making. The report is also utilized in the preparation of the action plan for combatting illegal immigration, in developing new legislation and in the operations of the above mentioned governmental inter-agency level working group on combatting illegal immigration.</p> <p>The police in Finland does not have a separate data collection or analysis mechanism for collecting information on combatting illegal immigration. Information regarding illegal immigration is mainly entered into the general police information system (an electronic register called PATJA) and to some other operational registers within the police administration, such as crime investigation register. The information coded in the PATJA register coded as R- or S-entry includes information regarding the parties involved/litigants, the type of suspected crime, including illegal migration routes and other details considered pertinent for solving the matter. Patja-register is also accessible to other authorities besides the Police, for ex. the Border Guard, Customs, the Finnish Immigration Service (MIGRI) according to what the national legislation stipulates on their user rights for this register.</p> <p>The Police also utilizes the international registers mentioned in the ad hoc query, as well other international and national registers, such as IES, SIS, VIS and the national aliens' register of Finland (UMA) maintained by MIGRI, from where information can be obtained regarding illegal immigration if needed.</p>

Disclaimer: The following responses have been provided primarily for the purpose of information exchange among EMN NCPs in the framework of the EMN. The contributing EMN NCPs have provided, to the best of their knowledge, information that is up-to-date, objective and reliable. Note, however, that the information provided does not necessarily represent the official policy of an EMN NCPs' Member State.

			<input type="checkbox"/> Revision of the visa regime X Deployment of advisers in countries of transit and origin X Information campaigns in the countries of origin X Recommendations for stakeholders <input type="checkbox"/> Other – please specify 17. Are there, from your point of view, approaches to improve the situation? Information should be shared on a regular basis with other EU Member States.
	Slovak Republic	Yes	<p>I. Personal data and institutional affiliation</p> <p>1. What authority do you belong to?</p> <input checked="" type="checkbox"/> Border police <input type="checkbox"/> Migration authority <input type="checkbox"/> Europol <input type="checkbox"/> FRONTEX <input type="checkbox"/> Other – please specify <p>2. In which country do you work? Please specify Slovak Republic</p> <p>II. Questions on the processing of data on illegal migration</p> <p>1. Are there collections of data in your country that contain information on illegal migration (such as travel routes, reports about human smugglers, modus operandi, profiles of migrants)?</p> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If yes, please provide a brief description. Multiple replies are possible. <input checked="" type="checkbox"/> Database 1 There are recorded data about migrants in the IS MIGRA - who crossed the state border of the Slovak Republic illegally or are staying illegally in the territory of the Slovak Republic, - who were refused entry to the territory of the Slovak Republic according to the special regulation, - who applied for asylum, subsidiary protection or temporary shelter in the territory of the Slovak Republic or, - who were granted asylum, subsidiary protection or temporary shelter in the territory of the Slovak Republic. Required information (travel routes, modus operandi, means of transport, etc.) are available only in the migrants interviews. It is possible to find this data manually in the minutes of the hearings of migrant, which are recorded in IS MIGRA. Statistical outcomes of these data are not possible. Regarding the datasets, beside IS MIGRA, there are two more datasets in which data such as travel routes, reports about human smugglers, modus operandi and profiles of migrants are being collected.
