1. Background Information

In view of drafting new regulations on procedures for entering foreigner's data into the Schengen Information System, the Office for Foreigners would like to know more about other Member States' practices in this regard and ask the following questions:

1. What is a time period the Member States can enter the foreigner's data into the Schengen Information System for the purposes of refusing entry or stay for?

2. In which circumstance the foreigner's data can be entered into the Schengen Information System?

We would very much appreciate your responses by 15th October 2013.

	Belgium	Yes	 From 3 up to 10 years Foreigner's data are introduced into SIS if: the foreign national, being an illegal resident or a legal resident whose endangered public order/tranquillity or national security and is subjected to a removal or expulsion decree, the illegally residing foreign national who is subjected to a re-entry ban in the sense of Directive 2008/115/EU.
	Estonia	Yes	 Mostly from 3 month up to ten years. In some cases a prohibition on entry can be permanent. Data on third-country nationals in respect of whom an alert has been issued for the purposes of refusing entry or stay can be entered if: the precept to leave (return decision) was filled; the court imposed expulsion with prohibition on entry as supplementary punishment; decision to apply a prohibition on entry was made by the Minister of the Interior.
+	Finland		 A prohibition of entry is ordered for a fixed term of a maximum of five years or until further notice. An alien who has been sentenced for an offence of aggravated or professional nature may be prohibited entry until further notice. The grounds for entering the foreigner's data into the Schengen Information System for the purposes of refusing entry are not laid down by law. The national practise however complies with Article 96 of the Schengen Treaty. Refusal of entry with regards deportation is registered into the SIS once there is a final decision on deportation. Refusal of entry with regards removal is registered as soon as the decision is enforceable and the appeal court does not prohibit the enforcement. Article 96: Data on aliens for whom an alert has been issued for the purposes of refusing entry shall be entered on the basis of a national alert resulting from decisions taken by the competent administrative authorities or courts in accordance with the rules of procedure laid down by national law.

		 2. Decisions may be based on a threat to public policy or public security or to national security which the presence of an alien in national territory may pose. This situation may arise in particular in the case of: an alien who has been convicted of an offence carrying a penalty involving deprivation of liberty of at least one year; an alien in respect of whom there are serious grounds for believing that he has committed serious criminal offences,
		including those referred to in Article 71, or in respect of whom there is clear evidence of an intention to commit such offences in the territory of a Contracting Party.
		3. Decisions may also be based on the fact that the alien has been subject to measures involving deportation, refusal of entry or removal which have not been rescinded or suspended, including or accompanied by a prohibition on entry or, where applicable, a prohibition on residence, based on a failure to comply with national regulations on the entry or residence of aliens.
Hungary	Yes	1-2. According to Act II of 2007 on the Admission and Right of Residence of Third-Country Nationals, entry and stay ban is ordered by the relevant immigration authority. The longest duration of an exclusion measure may not exceed ten years in the special case of the third-country national's residence in the territory of Hungary represents a serious threat to public security, public policy or national security. However, other types of expulsion have a period of 3 or 5 years. According to Section 9 of the Act CLXXXI of 2012 on the exchange of information in the framework of the second-generation Schengen Information System, immigration authorities may enter alerts and supplementary data on third country nationals in CS.SIS in accordance with Art. 24(2) and 26 of the SIS II Regulation. The alert shall be immediately deleted by the issuing authority or the SIRENE Bureau in cases of Art. 30 of the SIS II Regulation. Alert of third country nationals can be issued as well if their presence is estimated as a threat of national defence, security or public order in case of allowing the re-entry of the person concerned. Alerts shall be reviewed in every three year (cf. Section 22(1) of the Act CLXXXI of 2012 on the exchange of information in the framework of the second-generation Schengen Information System).
Italy	Yes	 The period may vary from 3 up to 5 years. This time limit may be overcome when the non-national is removed from Italy for reasons of public order, State security or because he/she is considered to be socially dangerous. Data of ineligible non-nationals are entered into SIS: Seven days after notification of the order of unescorted expulsion; Instead, in case of escorted expulsion, after the measure is enforced.

It is not made on the basis of a separate administrative decision concerning the registration in the SIS but on grounds of a decision regarding the refusal to stay ('refus de séjour') in combination with a decision on the prohibition of entry to the territory ('interdiction d'entrée sur le territoire').
Lithuania Luxembourg	Yes	The grounds for the entering into SIS are the refusal or annulment of a visa, the refusal or withdrawal of a residence permit, the refusal of entry into Lithuania, the obligation to depart from Lithuania, the return to the country of origin or a foreign country, the attempt to unlawfully depart or unlawful departure from Lithuania.
